FIRE RISK ASSESSMENT

PREMISES

Ferryfield is housed in a 17th century stone built building.

OCCUPANCY

There are varying number of people on the premises. We can accommodate up to 24 children at any one time, however at times this number can be significantly higher, for example: at collection time when parents and siblings can be present.

IGNITION SOURCES

There are a number of potential ignition sources in Ferryfield's building. These include electricity, gas, cooking facilities and arson.

HAZARDOUS MATERIALS

There are no hazardous materials in the building.

FIRE DETECTION SYSTEM

There are 2 smoke detectors in Ferryfield.

FIRE SUPPRESSION SYSTEM

There is a large water based fire extinguisher, a small CO² fire extinguisher and a fire blanket available in Ferryfield.

MEANS OF ESCAPE

There is one recognised means of escape in Ferryfield. However in an emergency, windows could be used as escape routes.

STAFF TRAINING

All staff have basic understanding of how to use fire fighting equipment. All staff have good understanding of the evacuation procedures.
